DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (page 5, paragraph 2), filed 10/25/2005, with respect to claims 1-4 have been fully considered and are persuasive. The rejection of claims 1-4 has been withdrawn.

Allowable Subject Matter

2. Claims 1-4 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method for transforming video data comprising an interest region by wavelet transform signal processing, which makes the non-ROI region have an expected resolution after the bit plane coding (specification, page 3, lines 8-11).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- setting low frequency image data as first interest region data; combining the first image data and the first interest region data to form a second interest region data; and combining the second interest region data and the second image data by bit plane coding to generate display data (see independent claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
